Plus, the "Hat" button takes on other control focus.

If Joystick controls…	Then Hat controls…
HERC	Turret
Turret	HERC
Probe	HERC

FlightStick Pro

THRUSTMASTER FLIGHT CONTROL SYSTEM (FCS):

Same as FlightStick Pro, above.

THRUSTMASTER WEAPON CONTROL SYSTEM MK. II (WCS)

THE WCS button lets you turn your WCS Mk. II ON or OFF, if you have one installed. (WCS Mk. I is not supported.) You must have a joystick installed to use a WCS. The WCS stick controls the HERC throttle. You may program the other WCS buttons to your liking. As a default, the first bank of six buttons corresponds to the six weapons [1]—[6].
