Instruction Card

Welcome to *Casino DeLuxe II*! You may install and play this game under Windows 3.1 or Windows 95, on a desktop or laptop computer.

Windows 95 Installation

Insert the game CD into your CD-ROM drive. If your computer is AutoPlay capable, a *Casino DeLuxe II* panel will appear automatically on your screen. Select *Install* and follow the onscreen instructions to complete the installation.

If your computer is not AutoPlay capable, open the *My Computer* folder on your desktop and select the drive letter that corresponds to your CD-ROM drive. Double click on the *Setup* icon and follow the onscreen instructions.

Windows 3.1 Installation

Insert the game CD into your CD-ROM drive. Under the *File* menu, select *Run*.

In the box that appears, type the letter of your CD-ROM drive, followed by a colon, then \SETUP.EXE and press the *enter* key. If your CD-ROM drive is the D drive, for example, you would type:

D:\SETUP.EXE

Follow the onscreen instructions to complete the installation. By default, the install program will create a program group called SIERRADELUXE2. To play, double click on the main game icon in the program group. The CD must remain in the CD-ROM drive while you play.

Laptop Installation (For Non-CD ROM Laptops)

To play this game on a laptop computer, you must first copy all the necessary game files from the CD onto several formatted, high density floppy diskettes.

Insert the game CD into your CD-ROM drive. Access the *LAPTOP* folder on the CD. This folder contains subfolders for each floppy disk you must create. Copy the folder called *Disk 1* to your first floppy disk, copy the folder called *Disk 2* to your second floppy disk, and so on.

When you have transferred all the necessary files onto floppy disks, insert the first disk, Disk 1 into your laptop computer's floppy drive. Run SETUP.EXE.

The installation will prompt you to insert each floppy disk in order until the installation is complete.
