

## BASIC KEYBOARD COMMANDS

## JOYSTICK CONTROLS

**Calibration:** In Windows 95, you enable and calibrate your joystick in the Control Panel. If you have additional control devices (rudder, pedals, WCS, etc.), they will need to be setup and calibrated in the same way. For Windows 3.1 joystick setup, see the README.

Once the joystick is enabled, select joystick button functions in the Simulations Preferences: Controls screen **F12**.

### Recommended Settings:

Joystick:	HERC Movement
Throttle:	Throttle
Rudder:	Turret Rotate/Rudder
Hat:	Views
Button 1 (Trigger):	Fire Weapon
Button 2:	Target
Button 3:	Center Turret
Button 4:	ATT on/off
Button 5:	Next Weapon
Button 6:	Shields Front
Button 7:	Shields Rear

# KEYBOARD COMMANDS

These are the default control settings for *EarthSiege 2*. You may customize many of these in the Simulation Preferences Controls window.
