

THE JUPITER INCIDENT

ALL-OUT INTERGALACTIC WARFARE

Coming February 2005

Unprecedented fleet customization
Tailor and control multiple detailed
spaceships; choose from over 40
ship types.

Epic campaign, spectacular real-time battles
Jump right into the action!
Use more than 80 weapons and
over 80 other devices.

Multiplayer via Internet and LAN
Create new content with extensive,
incorporated modding tools.

I. Getting Started

Welcome to **Empire Earth II**. This brief guide provides you with information on the basics of how to play the game and what to expect as you lead your civilization to glory. For more detailed information, please consult the **Empire Earth Encyclopedia**, which you can easily access from the game.

Installation

To install **Empire Earth II**, place the CD-ROM into your CD-ROM drive. The auto-install should start automatically. If it doesn't for some reason, access "**My Computer**" (by either double-clicking on the **My Computer** icon on your desktop or by going to **Start> My Computer** if you have **Windows®XP**) and double-click on the icon that represents your CD-ROM drive. Double-click on **Setup.exe**, and the auto-install will start.

After the auto-install starts, follow the directions on the screen to install **Empire Earth II**.

After installation, launch the game. If it's your first time playing **EE2** you'll be prompted to choose your skill level as an **RTS player**. The skill level you select determines overall game difficulty. You can also change these settings manually at any point before a game is started. Once you've made your selection you'll be presented with the **Main Screen**, where you can choose what type of game you'd like to play, view a recording of a game, adjust your game settings, and access the **Empire Earth Encyclopedia**. You can also view the credits for the game and access the game's map editor from the **Main Screen**.

Before you can start playing **Empire Earth II**, you must first decide which type of game you'd like to play.

Game Types

There are two types of games in **Empire Earth II**: single player and multiplayer.

Single Player – The single player game is made up of a short **Tutorial Campaign**, three **Campaigns** and the **Turning Points Collection**. In the **Campaigns**, you'll play through some of the most exciting historical events of **Korea**, **Germany** and the **U.S.** In the **Turning Points Collection**, you'll have the opportunity to fight two of the most famous

battles in history: the invasion of **Normandy** during **World War II** and the **Battle of the Three Kingdoms** in **China**, circa 230 – 480 AD.

From the **Single Player Screen** you can also play **Skirmish** games against the computer, **Saved Games**, and custom-made **Scenarios**.

Multiplayer – You can play multi-player games over the Internet through **Gamespy.com** or through a **LAN** connection. In multiplayer games, you can play with or against up to nine other players. You can join a game created by someone else or host your own game. If you do choose to host your own game, you will have a wide range of choices to make, including the game type, gameplay settings, map type, and environment options. The types of games are:

Conquest – In a **conquest** game, you seek to completely destroy your enemies. To eliminate a player by **conquest** you must destroy all his military units and all buildings capable of producing units. Teams can play **conquest**.

Crowns – Number. To win a **Crowns** game, you must win a certain number of crowns, specified by the host of the game.

Crowns – Time of Possession. The host specifies the amount of time in minutes that a player must have spent in possession of any combination of crowns in order to be declared the winner.

Territory Control – You must control a percentage of territories to win a territories game. The host decides how many territories are needed to win.

King of the Hill – At the beginning of a **King of the Hill** game, a neutral territory occupies the center of the map. The first player to capture and hold the **King of the Hill** structure in the neutral territory for a specified amount of time wins.

Capitols – In a **Capitols** game, your first **City Center** is your **Capitol** and cannot be destroyed, it can only be captured. If your **City Center** is captured, you have a host configurable amount of time to reclaim it, or you are out of the game. You can continue to follow the action as an observer, but you cannot talk to other players still in the game.

Allied Capitols – **Allied Capitols** is just like **Capitols**, except

you play on teams. As in **Capitols**, if your first **City Center** is captured and out of your control for that configurable period, you are out of the game. If, however, your teammate re-captures your **City Center**, control of the **Capitol** reverts to you, and you are back in action.

Regicide – Your duty in **Regicide** is to protect your king at all costs. If your king is killed, you are out of the game. Team play is available in **Regicide**.

Hot Spots – In **Hot Spots**, the game host selects a number of locations on the map considered to be vital. When the game begins, the first hot spot is visible, and all players vie to capture it by building a **Fortress** upon it. Once a spot is captured, the next one is revealed. The person with the most hot spots at the end of the game wins. **Hot spots** can be played in teams.

Sole Survivor mode is an option available for three of the game types: **Conquest**, **Regicide** and **Capitols**. In this mode, there can be only one winner - teams may be established during game setup and alliances may be entered into during the game, but when there is only one team remaining all alliances are automatically broken. When a game is created with locked teams, then all players on the same team contribute to satisfying the victory condition. Once this victory condition is met, then all players on the team are declared winners and the game ends. So if 9 territories must be controlled for victory, and 3 players on a team together control 9 territories then they win. If a game is created with unlocked teams, then alliances may still be entered into during the course of the game, but only one player may satisfy the victory conditions and win.

When you join a multiplayer game, you'll get to choose which civilization you'd like to lead. To help you decide, more information on each of the civilizations is presented later in this manual.

SETTING UP A GAME *(Multi-player or Skirmish)*

Before you can start your own **Single Player** or **Multiplayer** game, you must set parameters of the game. You will be able to select the civilization you would like to be, and what epoch you will be starting in, you will also be able to set the computers skill level. You can also choose the number of citizens that all players will start with.

When a game is created teams may be locked or unlocked. If teams are

locked, then all players on the same team contribute to satisfy the victory condition. If unlocked, then alliances may be changed during the course of the game but only one player can be declared the winner.

Population capacity can be set in one of two ways. One way is to assign all players a fixed population limit that they cannot exceed. The other way is to use a global population capacity, which is divided evenly between all the players at the start of the game. This can be set using the **Population Redistribution** option in the **Advanced** tab. When players are eliminated, their population will be redistributed among the remaining players in the game.

In a **multiplayer** game, when a human player exits a game the **On Player Exit** selection determines what happens to his remaining units on the map. The options include having a fully functioning **AI** take over, having a purely defensive **AI** take over, or removing all the player's units and buildings from the world.

The game options are organized into four tabs: **GAME**, **ADVANCED**, **MAP**, and **ENVIRONMENT**.

The **GAME** tab contains options for game pace, epoch range, starting resources, locking teams, enabling cooperative teams, maximum population capacity per city, and if there is an initial ceasefire. If a ceasefire is selected then no one can attack for the duration specified.

The **ADVANCED** tab contains options for game speed, enabling cheats, locking handicaps, enabling unbreakable treaties, city center population capacity, team placement, and the state of the **shroud** and **fog of war** at the start of the game.

The **MAP** tab contains options related to the physical size of the map, its geography, climate, elevation, forestation, resource distribution, and how many rivers (if any) are present on the map. There is also an option for loading custom maps.

The **ENVIRONMENT** tab contains options for the cycling of the seasons, setting the duration in minutes of the season (*if seasons are enabled*), the starting season, the time of day (*this determines the lighting used on the map*), whether weather and wind are present on the map.

QUICK START (Multiplayer or Skirmish)

Quick Start is a game setup variant that allows players to begin the game with more units, buildings, and technologies than the normal default mode. To enable this option in a **Multiplayer game**, the host checks the box labeled '**Quick Start**' located in **Game Settings**. **Quick Start** is also available in **Single Player Skirmish** mode. Once **Quick Start** is enabled, a drop down list box becomes active with the following options: **Small**, **Medium**, and **Large**. Each size level determines the number of troops and buildings that the player starts the game with.

When **Quick Start** is enabled, a '**Choose Forces**' button appears in the lower right corner of the screen. Pressing this button brings up a panel with the options for choosing starting forces. There are four **Empire Types** to choose from: **Balanced**, **Military**, **Imperial**, **Economic**. Each one features a different make-up of starting troops and buildings that are geared towards that style of play.

Once an **Empire Type** is selected, the starting forces can be further refined to suit the player's style by selecting from the following options: **Standard**, **Aggressive**, and **Defensive**. Each of these choices feature the icons and numbers of all the troops and buildings associated with that selection. The player can mouse over the individual icons and get a concise tool tip showing the unit type and quantity.

The **Choose Forces** button remains accessible until the player clicks '**Ready**' or '**Launch**'.

Game Settings

Use the **Game Settings** to determine how **Empire Earth II** will look, sound, and react. In the audio settings, you can decide whether or not you want to listen to the music and ambient sounds, and also set the volume. Use the video options to set your screen resolution and determine how detailed the game graphics will be. The game settings allow you to set your scroll speed and your mouse clicking speed, along with determining how frequently the game will auto-save. Here, you can also choose what type of **tool tips** – if any – you'd like to see. **Verbose Tool Tips** tell you everything you need to know about an object when you place your cursor over it. **Condensed Tool Tips** just show you the basics when you place your cursor over an object. There several other user interface options available in **Game Settings** as well. You can access the game settings from the **Game Screen** when you start the game, or by clicking the **Game Settings** button on the right side of the **Main Screen** anytime during the game.

Game Interface

Control Groups
Assign any combinations of units into numbered groups.

Scenario Information
Statistics window for Territory Control or Initial Cease Fire games.

Mini Map
Representation of the entire game map.

Toggle War plan
War plan overlay on or off.

Territories
View or hide territory boundaries.

Coordinated Attack
Allows the player to issue commands to your units with out having them react until you toggle it off.

Idle Citizen
Reveal citizens not assigned to a task.

Flare
Create a marker to note an important area on the map.

War Plans
Create, send or review plans of attack.

Player Info Display
Shows your player name, civilization the current Epoch.

Game Options Button
Opens the game settings screen.

Pause

Chat
Opens the text chat window.

Empire Earth II Encyclopedia
Opens the in-game help glossary.

Scenario Objectives
Recalls list of objectives in scenario games.

Crown Icon
Appears when a player has earned a crown. When you've earned a crown, a flashing icon appears. Click on it to choose your crown power. A meter in player color will indicate the time remaining.

Verbose Tool Tips
Explanations of game objects will appear here when selected by the mouse. Turn off verbose tool tips in Game Settings.

Game Clock
Time elapsed during current game.

Picture-in-Picture
Your second window into the game world.

PIP View Hot Keys
Use the hot keys to anchor the PIP camera to a unit, control group or point on the map.

Resource Meter
Displays quantity of resources collected. Citizens may be assigned onto or removed from a particular resource pile with left or right mouse clicks.

Territory Indicator
Amount of territories in your empire.

Information Panel
Show attributes of selected game objects.

Calendar
Track the changing seasons by the changing months.

Actions Panel
Displays available actions for selected unit.

Crown Display
Monitor progress in each Crown area.

Diplomacy
Propose or review alliances and declare war.

Citizen Manager
Click the button to open the full screen Citizen Manager which can be used to control all your worker units at once.

Technology Tree
Reveal technologies available for research.

Regional Power
Activates your special power

Territory Control Status
controls: 3 of 12, (6 more to win)
controls: 2 of 12, (7 more to win)
controls: 2 of 12, (7 more to win)
controls: 3 of 12, (6 more to win)

Temple
A building dedicated to divine worship. Garrison points inside a temple to produce Tech Points. From here priests.

Interface

Everything you need to know, see, and do is a mouse click or two away in **Empire Earth II**. The buttons and tools on the **Main Screen** give you full control over everything in the game. Here is what you'll find on the **main screen**:

- **PICTURE-IN-PICTURE** – The **Picture-in-Picture (PIP)** window is a second window into your game world. Most things which you can do in the main 3D view you can also do in the **PIP**.
- **WAR PLANS** – Clicking on the **War Plans** button brings you to the **War Plans** section of the **Full Map Screen**, where you can create, send, and review plans of attack with your allies.
- **CITIZEN MANAGER** – Clicking on the **Citizen Manager** button brings you to the **Citizen Manager** section of the **Full Map Screen**, where you can assign citizens to gather resources, help build or repair your buildings, create new **Farms**, **Oil Derricks**, or **Uranium Mines**, and review your current resource amounts.
- **PLAYER INFO DISPLAY** – In the **Player Info Display**, you'll see your name, your civilization and your current **Epoch**. When you have researched enough technologies (6) to advance to the next **Epoch**, the **Epoch** display becomes a button. Once you have enough technology points to advance to the next **Epoch**, the button will flash. Click it to advance to the next **Epoch**.

- **CONTROL GROUPS AREA** – You can assign any combination of units to a **Control Group**, which you can easily select later. To access the **Control Groups** area, click the **Fly-out** button to the left of the **Player Info** display.
- **GAME OPTIONS** – Click the right **Fly-out** button to access the **Game Options** button. Hitting the **ESC** key will also bring this panel up. The right **Fly-out** button also accesses **Chat** and the **Empire Earth Encyclopedia**, and the **Scenario Objectives** button if you are playing a scenario:
- **CHAT** – The **Chat** button opens a window that allows you to send messages to others playing the game.
- **EMPIRE EARTH ENCYCLOPEDIA** – Click the **Empire Earth Encyclopedia** button to access complete information on all the features of the game.
- **SCENARIO OBJECTIVES** – Clicking on the **Scenario Objectives** button brings you to the **Scenario Objectives** section of the **Full Map Screen**. Here you can review the current set of objectives for the scenario, including **Primary Objectives**, **Secondary Objectives**, and **Lose Conditions**. When appropriate, color-coded flags corresponding to the objective are placed on the map. Mouse over a flag or an objective name to receive more information about the objective. There is also an **Information** button which will give you a briefing for the scenario, hints, and historical background.
- **TECHNOLOGY TREE** – Click the **Technology Tree** button to see which technologies you can research. Mouse over each **technology** for a description. Click on a **technology** to research it.
- **DIPLOMACY** – Click the **Diplomacy** button to propose and review alliances, declare war or neutrality, and tribute resources, units, and territories.
- **CROWN DISPLAY** – The **Crown Display** button shows you the progress you are making in each of the **crown** areas. Mouse over the information for a particular **crown** to see current rankings for all players competing for that **crown**. Players are listed from top to bottom based on their qualification to win the **crown** and score. Only your score is visible by default, but you can use your **spy** to gather intelligence at another player's **city center** and there **crown** score will be visible for a period of time. When a player

has won a **crown**, the **crown** appears in the upper right corner of the screen. If you win a **crown**, click on the **crown** icon to select your **crown** power. If you mouse over a crown icon, you can see who owns it and how much time remains.

- **REGIONAL POWER** – This button activates the timed **Regional Power** that your civilization has access to (*see VIII. Regional Powers below*).
- **GAME CLOCK** – Displays the time since the start of the game.
- **GAME CALENDAR** – Displays the current game month.
- **VERBOSE TOOL TIPS** – **Verbose Tool Tips** are displayed above the **Picture-in-Picture** screen. You can turn these on or off through the **Game Settings**.
- **MINI-MAP BUTTONS** – There are several buttons on the **Mini-Map** to help you manage your world. Coordinated attack button.

Flare – To set a **flare** (*which can be helpful to communicate locations during multi-player games*), click the **Flare** button, then click a location either on the **Mini-Map** or on the **Main Screen**.

Idle Citizen – Click the **Idle Citizen** button to select an **idle citizen** and assign the lay-about to a task. If you have more than one **idle citizen**, click the **Idle Citizen** button again to select another one.

Coordinated Attack – Allows the player to issue commands to your units with out having them react until you toggle it off.

Territories – Click the **Territories** button to view or hide the **territory boundaries** on the **Mini-Map**.

Toggle Current War Plan – Allows you to view the most recent war plan sent to you on the **Mini-Map**.

Unit and Building Interface

When you select one or more units or buildings, the interface splits into an **actions panel** (*on the left*) and an **information panel** (*on the right*).

If you have a **single unit** or **building** selected, the **information panel** will show extended information for that unit, including name, health, attack damage, attack range, current conversion/capture loyalty, status from game powers and effects, and additional information depending on the type of unit or building.

If you have **multiple units** or **buildings** selected, the **information panel** will display a **single icon** for each type of **unit** or **building**, with a number indicating the number of that type selected, and a red triangle with a number indicating how many are below a certain health threshold. You can select all **units** of a given type by **left-clicking** on its **icon**, and deselect by **right-clicking**; clicking on the red triangle will only act on the damaged units. You can also **ALT+left-click** only the red triangle to select on the healthy units. You can also **SHIFT+left-click** to select multiple **types of units** in this manner.

If you have **selected** your own **unit** or **building**, the **actions panel** will display a set of buttons representing the set of available actions for that **unit**. If you have multiple **units** or **buildings** selected, the actions panel will only display buttons for the **active unit type** in the **selection**; the **active unit type** has a **blue border** around its **icon** in the **information panel**, and you can change which **icon** is active using the **left** and **right bracket keys** ([,]).

Some of the **action buttons** will instantly give orders to the **selected units** when you **click** on them (*for example, Stop, Explore, Search and Destroy*). Others will require additional input from the user, typically by **clicking** one or more times in the **game world** (*for example Move, Attack, Gather Resource*).

When you select a **citizen**, you will see two buttons – **Civilian Structures** and **Military Structures** – that indicate the types of **buildings** your citizen can build. Select one of these types, then select the specific building you'd like your citizen to build. Move the cursor to the **Main Screen** to place the building – if a **green outline** of the building appears, you've selected a valid location. If a **yellow outline** appears, this means this area is not on a player owned or allied territory and it will take longer to build. If a **red outline** appears, you cannot place the building in that location and will have to keep looking.

You can also **select** another player's **unit** or **building**. When you do, you'll see who owns the **unit** or **building** and your diplomatic status towards the player.

Your World

When you begin a game of **Empire Earth II**, only a small portion of the world is visible to you. As you explore your surroundings, more and more of the world is revealed. You can see where you are generally, along with the land you have already explored, in the **Mini-Map** located in the bottom left of the screen. The portion of the world you can see is in your **line of sight**. Areas that you haven't explored are hidden by the **black shroud**. If you've explored an area but don't currently have **line of sight** there, the area is clouded by the **fog of war**.

Your Views

You have several different ways of keeping track of the world around you. The **Main Screen** displays your current view, and you can **select units** and **issue orders** from this screen. As mentioned above, the **Mini-Map** shows you where you have been and indicates where your units, buildings, and resources are. You can also view the world via the **Full Screen Map**. Access the **Full Screen Map** by pressing **Tab**. From the **Full Screen Map**, you can manage your citizens and make war plans.

To move the **Main Screen**, you can use the **arrow keys**, or move the mouse off the edge of the screen. You can **zoom** the camera in and out using the **Page-Up/Page-Down keys** (*or using the mouse wheel if you have a wheeled mouse*).

The **Picture-in-Picture** window is another fully functional window into the game. You can **left-click** or **drag** to **select units** and **give them orders** by **right-clicking** on **targets**, just as you can in the **main screen**. You can also select units in the **main screen**, and order them to the **PIP** location by **right-clicking** in the window. To adjust your view in the **Picture-in-Picture** window, mouse over the **PIP** and use the **arrow keys**, **Page-Up/Page-Down keys**, and **mouse wheel** just as you would in the **Main Screen**. If you do not have any units selected, you can also **right-click** and **drag on the terrain** in the **PIP** to move the camera around.

You can set up to six **bookmarked locations** or **units** in the **PIP**, so that you can easily keep track of **multiple units** or **points of interest**. To **bookmark** a location, set the **Main Screen** to that location and then **click** the **bookmark** button. To **bookmark** a **unit** or **building**, select the unit or building you wish to **bookmark** and then **click** the **bookmark** button. To **view** a **bookmark** once it has been set, **click** the **bookmark** button again. To **clear** a **bookmark**, **right-click** on the **bookmark** button. You can cycle through your current **bookmarks** by clicking the **Cycle Bookmarks** button. There is also a **Flare bookmark** button, which will show the most recent **Flare** location.

To **copy** the **PIP** view to the **Main Screen**, click the **Copy PIP to Main Screen** button in the upper-left of the **PIP** window. To **swap** the **PIP** and **Main Screens**, click the **Swap Views** button in the upper-right of the **PIP** window.

II. Basic Concepts

There are a few basic concepts in **Empire Earth II** to employ in your strategy for world domination.

Epochs

As time passes, civilizations become more advanced. **Epochs** represent the changes in civilization over time. As you advance through the **epochs**, new and improved **buildings** and **units** become available to you.

To **advance** to a **new epoch**, you must first research technologies in the **Tech Tree**. When you have researched **6 technologies** and have the necessary **technology points**, you can advance to the next **epoch** by clicking the **Epoch** button.

You can choose, however, to remain in your current **epoch** to continue **researching technologies**. The more you research a certain **technology** area, the more **advanced** your **units** and **buildings** will become in the area. These special skills could come in handy down the road.

In fact, one of your most important strategic decisions will be when to **advance epochs**. Later **epochs** by definition grant you **better units** and **buildings**, but remaining in an earlier **epoch** longer to **research** additional **technologies** may ultimately give you an advantage over your enemies.

Cities and City Centers

The **City Center** is the **primary building** in your empire. It produces **Citizens** and is required to own a **territory**. **City Centers** are powerful and grant benefits to all units that lie within its range, also called your **city limits**.

To build a **City Center**, you must first have enough resources to build it. When you do, you can instruct your **citizen(s)** to build the **City Center**. Once the **City Center** is constructed, you can view the territory within your **city limits** by moving your cursor over the **City Center**. You'll also see your **city limits** any time you build another **building** within its boundaries.

A Territory can only support one City Center at a time.

Mobile units heal when inside the **city limits** of your own **City Centers**, as well as those owned by your allies.

As you advance through the **epochs**, **city limits** become larger. You'll notice an increase in size in **Epoch 4, 7, 10** and **13**.

Citizens

Your **citizens** keep your civilization going. They collect **resources**, and build and repair structures. **Citizens** are needed to help create and maintain your empire!

To **create** a **new citizen**, you must first construct a **City Center**. Once construction is complete, you can create a **new citizen** when you have the resources to do so by selecting the **City Center** and **clicking** the **unit construction** button.

One of the **citizens'** most important roles is **gathering resources**. These **resources** are used in the **construction** of **buildings** and the **creation** of **new units**. **Resources** fuel every civilization.

You can also use **citizens** to **garrison** certain **buildings**, making those buildings more efficient. Building that can be **garrisoned** include **Universities, Fortresses, Warehouses, Oil Derricks, Uranium Mines, City Centers, and Towers**. **Temples** can also be garrisoned, but only by priests.

Crowns

Crowns measure your skills as a ruler. There are three **crowns**: **Military, Economic, and Imperial**. If you are the best in one of these categories, you earn that **crown**, which gives you certain benefits. The first step to **winning** any **crown** is to **research** deeply into the **technology** of the corresponding **crown** area. You must **research** all four **technologies** in the appropriate branch to qualify.

Military Crown – There are other factors that determine your **crown** score. For the **Military Crown**, the more enemies you kill and buildings you destroy or capture, the higher your **Military Crown** ranking will be. Your ranking also increases for every **military technology** you research and every **military building, military unit, and wonder** you own.

Economic Crown – Your **Economic Crown** score will increase when you research **economic technologies, own economic buildings and wonders, operate trade routes, gather resources, and foster trade**.

Imperial Crown – Your **Imperial Crown** score is based on how many **imperial technologies** you've researched and number of **territories, roads, bridges, wonders, priests, spies, and medics** you control. Your ranking also increases based on your current population level, amount of resources you've captured, and the number of **enemy units** you've converted.

If you earn a **crown**, you will have a choice of a special benefit. These benefits last for only a certain amount of time, so choose wisely and act quickly.

Technology

Civilizations grow more advanced through technology. The **technologies** you can **research** are displayed on the **Technology Tree**.

To obtain a new **technology**, you must acquire **technology points**. There are several ways to earn **technology points**. **Garrisoned priests** can earn them at **Temples**, and **garrisoned citizens** can accumulate them at **Universities**. You also earn **technology points** when you claim a **territory**, capture a **Temple** or **University**, and occasionally when a **trade cart** visits **foreign Markets**. Once you have accumulated enough **technology points**, you can discover a **new technology**.

When you select the **Tech Tree** button, the bottom portion of the screen changes to reveal the types of technology you can research. Hold the cursor over a technology to view its description.

Population Capacity

The land can only support a limited number of **units**. This number is called the **population capacity**. Most **units** only contribute one point to the total number of **population capacity** points allowed, but some **larger units**, such as **mounted units**, contribute more. When you are creating **units**, you must carefully consider how to balance your military and non-military units.

You can increase your **population capacity** by **acquiring new territories** and **building additional City Centers**, and by building **Houses**.

Resources

Before **buildings** can be **constructed** and **units created**, resources must be gathered. The four main resources are **food**, **wood**, **stone**, and **gold**. There are also **special resources**: **tin** in **Epochs 1** through **6**, **iron** in **Epochs 4** through **9**, **saltpeter** in **Epochs 7** through **12**, **oil** in **Epochs 10** through **15** and **uranium** in **Epochs 13** through **15**.

To **collect** a **resource**, you must first find it. Once you've discovered a **resource**, you can instruct a **citizen** to begin gathering it by **selecting the citizen** and **clicking on the resource**. The **citizen** will continue to **gather the resource** until you tell him to stop. The exceptions are **oil** and **uranium**. To coax **oil** from the ground, **build** an **oil rig** over the **oil** and **garrison** the **rig**. Harvesting **uranium** is similar: **build** a **mine** over the **uranium** and **garrison** it to extract **uranium**.

Territories

The world is divided into **territories**. You can tell who owns each **territory** by the **color** of the **border**. A **solid border** means that the territory belongs to a player. A **dotted line** means that there is no **City Center** on the **territory**, so its ownership is in dispute. When a territory is in dispute, the owner gains no benefit from any houses he's constructed in the territory. This includes all population morale, fervor and resource drop off bonuses. A **gray border** indicates an **unclaimed territory**.

To claim a **territory**, you must build a **City Center** in it, provided that this **territory** is adjacent to one you already own. If you want to claim a **territory** that does not border your own, you must build a **City Center** and a **Fortress** to protect it. There can only be one **City Center**, one **Temple**, one **Market**, one **University**, and up to **six houses** on any single **territory** at a time. As well, you are limited as to the number of **Outposts**, **Fortresses**, **Anti-Aircraft Guns** and **Coastal Defenses** you construct in each **territory**. Your **units** and **buildings** will have an increased attack value when they operate within your **territory borders**.

Building houses in your **territories** grants even more benefits. **Resource gatherers** are more efficient and drop off additional goods. Your **units** (*as well as other friendly units*), wanting to protect their home turf, inflict more damage on enemies ("**Fervor**") and take on less damage themselves ("**Morale**").

You can **conquer** another player's **territory** by capturing his **City Center**, provided that the **territory** is adjacent to yours. If the **territory** is not adjacent to yours, you must capture the **City Center** and **either build or capture a Fortress** to take over. You can **construct buildings on territories** that are unclaimed or owned by another player, but there is a significant build time increase for doing so – and the **building-type limitations** always apply.

Weather

Weather conditions such as **snow**, **rain** and **wind** affect **units**, slowing their movement and reducing their range of sight. **Extreme weather** such as **blizzards** and **sandstorms** will increase these penalties. For example, **projectiles** fired upon **airborne targets** during a **sandstorm** may miss.

A wise **commander** will use **Outposts** to predict the **weather**. Use the knowledge of upcoming **weather conditions** to adapt your strategy and force compensation to your advantage.

III. Units

Creating Units

Each **unit** is **created** at a particular **building**. To create a **unit**, you must first build the appropriate **building**. Then, when you have the necessary **resources**, you can create the **unit** by selecting the **building** and **clicking the unit creation** button.

Selecting Units

To **select a unit**, **left-click** on it in the **main screen** or the **PIP**. You can **select several units** at the same time by **holding down the left mouse button** and **dragging** a box around the **units** you wish to select. **Double left-clicking** on a **unit** will select all **units** of that type. **Hold down ALT** while **left-clicking** to select a formation of **units**. **Holding down shift** while **using any of these methods of selection** will add the **new units** to the **current selection**.

If you'd like to be able to easily **select a particular group of units** again, you can assign them to a **control group**. With your **desired units selected**, press the **control key** and select a number, **0-9**, or **select one of**

the **empty slots** in the **control group** area. Then, when you want to **select these units** again, simply **press the number you've assigned** them to or **click the appropriate slot** in the **control group** area.

Upgrading Units

Each **military unit** can also be **upgraded to veteran** and then **elite status**. This **upgrade** will increase the **unit's abilities**. The name of the **unit** will change to show the upgrade. In EE II, units and buildings upgrade automatically based on epoch.

Moving Units

To move your **selected units**, **right-click** on the **location** you'd like the **units** to **move** to. This destination can be in the **main screen**, the **PIP**, or the **Mini-Map**. You can also instruct them to **move** by **left-clicking** on the **move** button, and then **left-clicking** on your **desired destination**.

You can tell a **single unit** or **group of units** to take on a **certain stance**, which **governs the unit's** behavior. You can also set the **stance** of all **units** of a **particular type** in the world by **selecting the unit** and **holding down the ALT key** and **choosing a stance**; this will also change the **stance** for **units** of that **type** which are subsequently produced. The **stances** that units can take are:

Aggressive – Aggressive **units** actively engage **units** within their lines of sight, and they will continue to pursue enemies until one side loses. If your **units** win the battle, they will return to their original position. Units set on aggressive will not return to their original location after they engage the enemy.

Defend – **Units** will attack any enemy unit that comes into their lines of sight, but they will not actively seek out or pursue enemies. If your **unit** wins the battle, it will move back to its original position.

Hold Position – **Units** will not move to engage an enemy, but will attack an enemy that enters its range.

Hold Fire – **Units** will not move or attack.

Cautious – Cautious units flee enemy **units**, avoiding contact at all costs.

You can also issue specific orders to your units. The orders are:

Attack Move – Your **units** will move to the location you specify, engaging enemies in battle along the way.

Explore – **Units** will explore the land, avoiding enemies.

Search and Destroy – **Units** will seek out enemies with the sole purpose of fighting them.

Attack. When told to attack, your **units** will engage the enemy, then return to their previous stance when the battle is done.

Attack Group of Units – Similar to Attack, but your selected **units** will distribute the target units they attack among those near to the one you clicked on.

Attack Preferred Type of Units – Similar to **Attack**, but in addition you specify that you would like the selected **units** to select future **attack targets** of the type you clicked on (*for example, you could use this to specify that you want a group of **Swordsmen** to direct most of their attacks towards **Bow Men***).

Move – When given a simple move order, **units** move to the desired location, ignoring what their current stance is.

Rally Point – **Buildings** that create **units** can use this function to set a point where the new units that are produced will go once they are created.

Guard Unit – The **unit** will guard another specified **unit**.

Patrol – **Units** will follow a patrol path, engaging enemies that come within range.

Stop – **Units** will stop all movement.

Capture – **Infantry units** can be ordered to capture a building from the enemy.

Gather Resource – **Citizens** and **fishing ships** can be ordered to gather a resource.

Build/Repair – **Citizens** can be ordered to help build or repair one of your buildings.

Attack Ground – Orders the unit to fire its weapon at a specified ground location

Build Civilian Structures, Build Military Structures – Use these buttons to order your **citizens** to build a variety of **Civilian** or **Military buildings** and **structures**.

Auto-cast – **Units** with special powers can be ordered to automatically use them as their **default attack** by **right-clicking** on their special power button.

Coordinated Attack – **Coordinated Attack** allows you to queue up orders for **multiple units** and then execute them simultaneously. This is particularly useful when coordinating a large attack against an enemy target from different locations. To initiate a **Coordinated Attack** first press the **apostrophe key**. This displays the **Coordinated Attack** icon in the upper left hand corner of the screen. Then **select** the units you want to participate and give them their **orders**. Only **attack** and **movement orders** are valid. When you are ready to go, press the **apostrophe key**. Now watch as your master plan unfolds.

Unit Types

There are many different **units** in **Empire Earth II**, and each serves its own purpose.

Citizens – Citizens are the “bread and butter” of your civilization, and all of their functions are discussed previously in this manual. They are created at **City Centers**.

Special Units – There are several **units** that serve a special, valuable function in your **civilization**. The **special units** are **priests, spies, scouts, medics, and HERCs**.

Priests – **Priests** are created at the **Temple**. These powerful **units** have the ability to convert **enemy units** to your side. When **priests** are at full strength, they can convert an **enemy unit** within their range, but doing so will sap the **priest's strength**. When the **priest recovers**, he can convert more **enemies**. **Priests** can also bless units within their range, granting these units a bonus.

Spies – Spies are versatile **units** that can provide you with a number of services. **Spies** are also very stealthy and may only be spotted by other **spies** and **outposts**. This applies to all players in the game, including your **allies**.

The services that spies can provide are:

Sabotage – The **spy** shuts down an enemy building.

Restore – A **spy** can also reverse the effects of sabotage on a building.

Toxic Contamination – The **spy** will poison another player's **Warehouse** or **City Center**. While poisoned, units within the city become ill and the goods stored at the **Warehouse** are tainted. When a **city center** or **warehouse** is contaminated, any **citizen** that drops off **resources** there also becomes contaminated. If this happens, the **citizen** takes damage for as long as it is contaminated.

Toxic Cleanup – If one of your **Warehouses** or **City Centers** has been contaminated, your **spy** can clean it up.

Gather Intelligence – To tell a **spy** to gather intelligence select a **spy** and click the **Gather Intelligence** button. Then, select a neutral or enemy building. The **spy** will gain line of sight of all buildings of that type. If you select a **City Center**, you'll be able to view all of that player's **crown** information. In addition, each time a **Spy** successfully **Gathers Intelligence**, you will be awarded some of the enemy's **Technology Points**.

Extraction – With **extraction**, you can smuggle your **spies** out of enemy territories.

Spies must be at 100 % power to conduct any of these actions. The ability to utilize some of these abilities must be researched in the Tech Tree.

Scouts – **Scouts** can be sent out to explore the land, uncovering resources and enemies. They are created at **City Centers**.

Medics – **Medics** can heal your damaged units on the battlefield. They can only **heal human units** and **units** that have a **visible human crew**. **Medics** are produced at the **university**.

Repair HERCs – Repair **HERCs** can fix the complex machinery of other **HERCs**. **HERC's** are produced at the **HERC Manufacturing Facility**.

Leaders – **Leaders** are noted dignitaries in your civilization, adept at military, economic, or imperial skills. These **leaders** are so important that they should be protected at all costs. You may only have one **leader** at a time. Each **leader** has his or her **own powers**, some of which are **active powers** (*which means that you'll have to tell the leaders to employ them*) and some of which are **passive** (*which means that the power is always in effect*). Sometimes, you are blessed with a leader at the start of a scenario, but generally you have to earn them. When you win a **crown**, you temporarily gain the a **leader** of that type at your starting (*or oldest*) **city center**. If you have no city centers, you do not receive a leader.

Land

Land units are among the first military units that you can create.

Heavy Artillery – **Heavy Artillery** units inflict heavy damage from great distance. They are effective against **Heavy Infantry** units and **Light Mounted** units, but are vulnerable to **Light Infantry**, **Heavy Mounted** units and **Bombers**. The types of **Heavy Artillery** are the **Onager**, **Catapult**, **Trebuchet**, **Bombard Cannon**, **Siege Gun**, **Self-Propelled Artillery** and the **Net Fire Launcher**. **Heavy Artillery** is produced at the **workshop** and **factory**.

Heavy Infantry – **Heavy Infantry** first become available in the **Epoch 1**. They are good against **Light Artillery**, **Anti-Aircraft** units and **Light Mounted** units. **Light Infantry**, **Heavy Artillery** and **Bombers**, however, can exploit the **Heavy Infantry's** weaknesses. **Heavy Infantry** units are trained at the barracks. **Heavy Infantry** units include **Maceman**, **Spearman**,

Swordsman, Man at Arms, Pikeman, Musketeer, Halberdier, Regular, Rifleman, Machine Gunner, Assault Rifleman, Mini Gunner and Objective Force Warrior.

Heavy Mounted – Heavy Mounted units are the both quick and powerful, able to take on quite a bit of damage. They are made at the **Stable** until **Epoch 10**, and at the **Manufacturing Plant** from **Epoch 11** to **Epoch 15**. They are particularly damaging to **Light Infantry** and **Heavy Artillery**. They are vulnerable to **Light Artillery**, **Light Mounted Infantry** and **Bombers**. The **Heavy Mounted** units are **Mounted Infantry**, **Armored Cavalry**, **Medieval Cavalry**, **Lancer**, **Imperial Lancer**, **Machine Gun Tank**, **Assault Tank**, **Main Battle Tank**, **Gun Helicopter**, **Minotaur Heavy HERC**, **Heavy Gun Helicopter**, and **Myrmidon Heavy Tank**.

Light Artillery – They are effective against **Light Infantry** and **Heavy Mounted** units and vulnerable to **Light Mounted** and **Bomber** units. **Light Artillery** units include the **Stone Thrower**, **Scorpion**, **Ballista**, **Culverin**, **Field Gun**, **Field Artillery**, **AA Half-Track**, **Mobile Rocket Launcher (MRLS)**, **Paladin Point Defense**, **Stinger HMMWV**, and the **Fusion Caster**. **Light Artillery** can inflict quite a bit of damage and can also move faster than **Heavy Artillery**. They are manufactured at the **workshop** and the **factory**.

Light Infantry – Light Infantry provide a balance between speed and power. They are built at the **Barracks** and are especially good against **Heavy Artillery** and **Heavy Infantry** units. **Light Artillery**, **Heavy Mounted** and **Bomber** units are most effective against **Light Infantry** units. These units include the **Bow Man**, **Composite Bow Man**, **Crossbow Man**, **Grenade Pistoleer**, **Grenadier**, **Mortar**, **Incendiary Mortar** and **Bomblet Mortar**.

Light Mounted – Light Mounted units are built at the **Stable** and, after **Epoch 10**, the **Manufacturing Plant**. They are most damaging against **Light Artillery**, **Anti-Aircraft** and **Heavy Mounted** units. They are vulnerable to **Heavy Infantry**, **Heavy Artillery** and **Bomber** units. The **Light Mounted** units are the **Mounted Slinger**, **Mounted Skirmisher**, **Horse Archer**, **Carbineer**, **Dragoon**, **Gun Tank**, **Tank Destroyer**, **RPG Striker**, **Disruptor Medium Tank**, **Artemis Light HERCs**, and **Heavy Missile Helicopter**.

Rams – Rams can be used to attack a variety of enemy **structures**, including **walls**, **palisades**, and **buildings**. They become available in **Epoch 3**.

Siege Towers – Siege Towers are used for transporting troops across the battlefield. It becomes available in **Epoch 4**.

Sea

All sea units are built at the **Dock**.

Aircraft Carriers – Aircraft Carriers bring a little air power to the seas. The **Aircraft Carrier** first becomes available in **Epoch 11**, and a second type of aircraft carrier, the **Sea Archer**, becomes available in **Epoch 14**.

Battleships – Battleships are effective against land, sea and air units. The other battleships are **Missile Cruisers** and **Leviathans**. They are most effective against **Destroyers** and **X-Ships** and are vulnerable to **Submarines**, **Attack Submarines**, and **Nuclear Bombers**. They are first available in **Epoch 11**.

Destroyers – The fast-moving Destroyer is particularly deadly against **Submarines**, but is vulnerable against **Battleships** and **Missile Cruisers**. They have a variety of arms, including anti-aircraft guns and depth charges. The **Destroyer** becomes available in **Epoch 11**. Subsequent epochs witness the rise of the **Sensor Destroyer**, and the **X-Ship**.

Fighting Sail – They are fast and very deadly. They are excellent against **Frigates**, but **Galleons** are effective against them. The warships are the **Caravel**, the **Ship of the Line**, and the **Iron Clad**. **Fighting Sail** first become available in **Epoch 6**.

Frigates – Flanked on both sides by cannons, the **Frigate** is designed to broadside other ships. They are especially damaging to **Galleons**, but have trouble fending off **Warships**. They become available in **Epoch 6**. The frigates are the **Barque**, **Privateer**, and **Frigate**.

Galleons – In **Epoch 6**, **Galleons** become available. They are tough ships, able to take on and inflict a lot of damage. They are effective against **Warships** but vulnerable to **Frigates**. The **galleons** are the **Galleass**, **Carrack**, and **Galleon**.

Submarines – **Submarines** travel beneath the seas, unnoticed by all except for **Destroyers**. While it is under the sea, however, it cannot fire upon enemies. It must emerge from the deep to fire its missiles. **Destroyers** and **Nuclear Bombers** can inflict significant damage against **Submarines**, but the **Submarine** can punish **Battleships**. **Submarines** are first available in **Epoch 11**. The other types of submarines are the **Attack Submarines** and the **Manta Submarine**.

Galley – **Galleys** are the earliest ships. In **Epoch 1**, the **Galley** is available, followed by the **Trireme** in **Epoch 3** and the **Decareme** in **Epoch 5**.

Air

Air units are built at the **Airport** and **Hangar**. **Helicopters**, **Observation Balloons**, and **Satellites** are produced at the **Hangar**, while all fixed wing aircraft are built at the **Airport**. They cruise the skies, firing upon other aircraft as well as ships and land units below.

Bombers – **Bombers** are especially good against **Land Units** and are vulnerable to **Fighters** and **Anti-Aircraft Guns**. **Bombers** are first available in **Epoch 11** with the advent of the **Twin Engine Bomber**. In **Epoch 12**, the **Quad Engine Bomber** is available, followed by the **Jet Engine Bomber** in **Epoch 13** and the **Stealth Bomber** in **Epoch 14**. The most advanced bomber is the **Orbital Bomber**, available to you in **Epoch 15**.

Fighters – **Fighters** are quick planes with long-range guns. **Fighters** are excellent against **Bombers** and **Tactical Bombers** but are vulnerable to other **Fighters**. The **Biplane** is the first **Fighter**, available in **Epoch 11**. The other **Fighters** are the **Interceptor**, the **Jet Fighter**, the **Stealth Fighter**, and the **Atmospheric Fighter**.

Tactical Bomber – **Tactical Bombers** are very fast and can deliver significant payloads. They are especially effective against **Sea Units**. The earliest **Tactical Bomber** is the **Tri-Plane**, available in **Epoch 11**. The other **Tactical Bombers** are the **Dive Bomber**, the **Strike Fighter**, the **Stealth Tactical Bomber**, and the **Smart Plane**.

Nuclear-Bombers – **Nuclear Bombers** are aircraft capable of carrying and delivering a **single thermonuclear device** onto a target. **Nuclear Bombers** are especially good against **Land Units** and are vulnerable to **Fighters** and **Anti-Aircraft Guns**. The **Nuclear Bomber** is first available in **Epoch 12**.

Non-Combat Units

There are several units that bring a lot of value to your civilization without going into combat.

Scout – A unit with fast movement and long **line-of-sight**, the **Scout** is perfect for exploration. **Scouts** are built at the **city center**.

Trade Cart – The **Trade Cart** transports valuable goods to and from cities. **Trade Carts** are made at **Markets**.

Fishing Ships – **Fishing Ships** haul the bounty of the seas to your shores. **Fishing Ships** are built at **Docks**.

Cargo Ships – **Cargo Ships** carry units across the waters. There is a limit to how much a **cargo ship** can carry, though. **Cargo Ships** are built at **Docks**.

Observation Balloon – The **Observation Balloon** allows you a birds-eye view of the land, so you can plan your battle strategy or discover new resources. **Observation Balloons** are build at the **hangar**. It is available in **Epoch 11**.

Transport Helicopter – The **Transport Helicopter** functions very much like a **Cargo Ship**. Use it to carry **units** from one place to another. **Transport Helicopters** are constructed at **Hangars**.

Paratrooper Plane & Heavy Paratrooper Plane – The **Paratrooper Plane** and **Heavy Paratrooper Plane** allow you to transport men into battle. The **infantry units** are already loaded in the plane when it is built. It is available in **Epoch 12**. The **Paratrooper Plane** and **Heavy Paratrooper Plane** are built at the **Airport**.

Satellite – The **satellite** is capable of flying at high altitudes and transmitting visual and auditory information back to its base. They can only be detected by **outposts** and may only be attacked by **fighters**. The **Satellite** is built at the **Hangar**.

IV. Buildings

Without buildings, you cannot produce any units. The **buildings** in **Empire Earth II** are:

Air Defense – The air defense building's sole purpose is to attack enemy aircraft. It is developed just ahead of aircraft and is first available in **Epoch 10**.

Airport – All fixed wing aircraft are made at the **Airport**. You can garrison planes at the **Airport**. The first **Airport** becomes available in **Epoch 11**.

Barracks – Infantry units are trained at the **Barracks**.

Bridge – **Bridges** span rivers, easing transportation.

City Centers – **City Centers** are discussed thoroughly in the first chapter of the manual.

Coastal Defense – **Coastal Defense** buildings protect your shores from enemy ships. They first become available in **Epoch 2**.

Dock – All boats are built at the **dock**.

Farm – Workers grow food on the **Farm**. They are first available in the **Epoch 2**.

Fortress – **Fortresses** defend your territories from invaders. If you garrison men at the **Fortress**, it provides better protection.

Hangar – **Observation balloons**, **helicopters**, and **satellites** can be created and **garrisoned** at the **Hangar**. **Observation balloons** are built in **Hangars**. The **Hangar** first becomes available in **Epoch 13**.

HERC Manufacturing Facility – An advanced manufacturing facility, all **HERCs** are built here. It becomes available in **Epoch 14**.

House – Your citizens enjoy a warm hearth at their **House**. **Houses** confer a bonus to your population capacity, as well as to **morale** and **fervor**.

Market – Goods are bought and sold at the **Market**. It is first available in the **Epoch 2**. They have the ability to create **Trade Carts**, these units are used to create trade routes with **Markets** from other territories.

Workshop – Pieces of **Heavy** and **Light Artillery** are made at the **Workshop**, and soldiers are trained to use them.

Outpost – At the **Outpost**, enemies are spotted long before they make inroads into your cities. These defensive structures can gain the ability to attack in **Epoch 1**. **Outposts** also have the ability to spot spies.

Palisade – **Palisades** lightly fortify your perimeter.

Roads – **Roads** increase the speed of any unit, friend or foe. To build a **Road**, select a citizen then select the **Road** button. Place your cursor where you'd like the **Road** to start and **click your mouse** button. Then, **drag the mouse** to draw the **Road**. The cost will be displayed. **Left-click** to place and bend, then **right-click** when your plan is complete, and the citizen will get to work.

Stable – Horses are bred and soldiers are taught to ride them at the **Stable**. All mounted units are produced here.

Temple – **Temples** house **priests**, who research ancient myths to devise new and exciting technology. **Temples** can be garrisoned with **Priests** to produce technology points.

University – **Spies** learn their craft here, and other wise men conduct research into **new technologies**, producing **tech points**. **Citizens** garrisoned at the **University** will increase the production of **tech points**. **Universities** also train **Medics** in the arts of healing.

Wall – **Walls** provide valuable protection to your lands against the onslaught of enemy forces. Be sure to build a gate into your **walls** to allow **citizens** and **soldiers** to get in and out. Wall connector sections can be upgraded into powerful **Wall Towers**.

Warehouse – The **Warehouse** stores all the goods your citizens gather and those procured by trade. You can garrison **citizens** here to increase the **Warehouse's** efficiency.

Missile Silo – The **Missile Silo** becomes available to you in the **Epoch 13**. ICBMs are built at the silo, and they inflict devastating damage.

V. Combat

Land is won and lost through combat. You have a varied military force at your disposal, and how you choose to use them can determine your success or failure as a world leader.

- **Attacks** – Each military unit has a default attack that it uses unless you instruct it otherwise. Attacks vary based on the type of unit.
- **Formations** – When you group units of the same type together into formations, they become more effective.

Land Formations

- **Wedge** – The most heavily armored units will line up in front, followed by the medium armored units. The light units and any special units will follow behind.
- **Phalanx** – The Phalanx protects itself on three sides by packing its middle and rear with weaker units.
- **Staggered Line** – In a staggered line, your units are well mixed – units of the same type try to stay away from each other. This formation provides good protection against bombs and other weapons that have a wide-ranging effect.

- **Double Line** – Units in line formation are closely packed in together with ranged units placed in the rear and melee units in the front.

Sea Formations

- **Line** – Broadside-firing ships are most effective in the line formation.
- **Crescent** – Ships try to surround the enemy to deliver punishing blows.
- **Phalanx** – The **Phalanx** formation is a classic defensive formation that provides effective protection.

VI. Diplomacy

You can enlist other players to your aid and wage war against others through diplomacy.

Diplomatic States

Your relationships with other players in the world are defined through **diplomatic states**. You manage these relationships through the **Diplomacy Screen**. There are three diplomatic states: **allied**, **neutral** and **hostile**.

Allies – You enter into an **alliance** when an **alliance proposal** that you create is accepted by another player, or you accept a **proposal** from another player. **Allies** can help each other in times of war, and trade between two allies is more profitable.

Alliances can break down for a couple of different reasons. If you declare war on an ally, your **alliance** is immediately dissolved. Some alliances have a time limit, and when the time limit expires, the alliance expires as well.

Various terms of the **alliance** can be altered, including **line of sight privileges**, **border rights** and **resource rights**. If that is not appealing to the player the deal can be sweetened by sending a player a gift when proposing an **alliance** which can be as simple as resources but can include units and territories. And, if you have the upper hand you can demand these instead, or even trade of units for land or resources. The possibilities are limitless.

When you propose an **alliance** to another player, you can choose to send **tribute** and determine the rights that your ally will have to your lands.

Neutral – When another player is neutral towards you, he or she doesn't have any particular opinion of you. You can trade with neutral players, and you can also attack them. Of course, if you attack a neutral player, they may not feel so neutrally towards you any more.

Hostile – When you are hostile towards another player, your cursor automatically changes to an attack cursor any time you mouse over the enemy's units.

Phalanx – The **Phalanx** is a classic formation that can be used to protect vulnerable ships.

Tribute

To win the favor of other players – or to placate them – you can offer them **tribute**. You can send just about anything you have as **tribute** – **units**, **resources** and even **territories**.

Making War Plans

From the **War Plans Screen**, you can create detailed war plans to share with other players in advance of an attack planned on an enemy. The **War Plans Tool Box** helps you design your war plan. You can illustrate where other players should march and even dictate how they should go about getting there. **War plans** ensure that you and your allies are in agreement before any attack.

VII. Civilizations and Regions

Each region and civilization in **Empire Earth II** has its own special **bonuses, granting advantages** over the other regions and civilizations. Further, each civilization, taking full advantage of their environments, has unique units that no other civilization has. The available unique unit changes in **Epochs 1, 6 and 11**.

Western

Dedicated students in western cultures lead to more productive **universities**. **Universities** produce more **tech points** and are harder to capture. They also have more **health**. When a western civilization captures a **City Center, Temple or University** from another culture, the Westerners absorb some of the enemy's knowledge, taking additional **tech points** from the enemy player.

- **Germans** – The German attribute is **Synthetic Materials**. The Germans are particularly adept at mining special resources. As a result, all units require less special resources. Furthermore, **Heavy Infantry** units have more health. The German unique units are the **Barbarian, Teutonic Knight, and Jagdpanther Tank**.
- **British** – **Trading Companies** are Britain's special attribute. **Masters of the sea**, British **war galleys, fighting sails and battleships** inflict more damage than other **civilizations' war galleys, fighting sails and battleships**. The British unique units are the **Druid, Light Horse, and M16 agent**.

- **Romans** – Romans are known for their organized approach to warfare and their professional armies. The Roman power is **Art of War**. With **Art of War, Barracks and Workshops**, and **Factories** cost less and **Heavy Infantry** inflicts more damage. Their unique units are the **Legionnaire, Mercenary, and Arditi**.
- **Americans** – Americans foster a **Free Enterprise** system in their civilizations. All trade routes yield more gold than normal. Furthermore, **Fighters, Tactical Bombers and Bombers** can inflict more damage. America's units are the **Frontiersman, Minuteman, and M18 Hellcat**.
- **Greeks** – The **Socratic Method** originated in Greece, and it has a pronounced affect on the civilization. **Universities** cost less, and all light infantry have more health. Their units are the **Hoplite, Byzantine Lancer and Partisan**.

Middle Eastern

The **Middle East** bridges the western and eastern world, and trade is lucrative here. **Middle Eastern** trade routes produce more **gold**, and **Markets** are more difficult to capture or destroy. Furthermore, when a **Middle Eastern** culture constructs a **Wonder, tech points** are instantly produced. In fact, enough **tech points** will be generated to allow the culture to instantly advance to the next **Epoch**.

- **Egyptians** – The Egyptian special attribute is **Monuments**. This enables the Egyptians to construct wonders for less. **Light Mounted** units also have more health. Its units are the **Royal Elephant, Bedouin, and EIFV** (*Egyptian Infantry Fighting Vehicle*).
- **Turks** – The Turkish attribute is **Fortifications**. As evidenced by the famous walls of Constantinople, the Turks are masters of fortifications. **Walls, Gates, and Towers** cost less, and **Palisades and Palisade Gates** have more health. Furthermore, **Heavy Artillery** inflicts more damage. The Turkish unique units are **Spahi, Janissary, and Trench Gunner**.
- **Babylonians** – Babylonians were among the first law makers, and their attribute is **Rule of Law**. With **Rule of Law, Spies** recover their power faster. **Light Infantry** inflicts more damage. The Babylonian unique units are the **Assyrian Bow Man, Mameluke, and Desert Fighter**.

Far Eastern

The **City Center** in Eastern cultures is a powerful place. It grants extra population capacity and is harder to capture and has more health. Furthermore, when you advance to a new **epoch**, you are blessed with one **free technology**. This **technology** will be chosen at random.

- **Korea** – The Korean special attribute is **Cultural Independence**. Korean units are particularly strong willed and take longer to convert. All **Heavy Mounted** units inflict more damage. Its unique units are the **Hwarang**, **Hwachacha**, and **Mortar Team**.
- **Japan** – The **Bushido Code** governs Japanese culture. **Barracks**, **Stables**, and **Manufacturing Plants** cost less, and **Fighters** and **Tactical Bombers** inflict more damage. Japan's unique units are the **Samurai**, **Ninja**, and **Zero Fighter**.
- **China** – China's special attribute is **Governors**. With this attribute, **City Centers** are less expensive, and **Heavy Infantry** units have more health. China's unique units are the **Dragon Archer**, **Dragon Song**, and **Type 96 Heavy Tank**.

Meso-American

Temples in Meso-American cultures are especially sacred, and the **priests** there can produce **tech points** more quickly. **Temples** are harder to capture and have more health. **Priests** themselves are quite powerful, too. When they convert an enemy, you will be granted additional **tech points**, provided that you and your enemy are in the same **epoch**.

If your enemy is one or more **epochs** ahead of you, you will earn an even higher number of **tech points** if you convert an enemy unit. If, however, your enemy is below your current **epoch**, you'll earn less than points than you normally would when converting a unit.

- **Incas** – The Incan attribute is **Cities of Gold**. Citizens mine **gold** faster, and **Light Infantry** has more health. Its special units are the **Bola Thrower**, **Eagle Warrior**, and **Thunder Gun Self-Propelled Artillery**.

- **Aztecs** – Aztecs are adept at **Pathfinding**. With this attribute, unit speed is not affected by poor weather. **Light Artillery** also inflicts more damage. The Aztec unique units are the **Atlatl Thrower**, **Jaguar Knight**, and **Jungle Healer**.
- **Mayans** – Blessed with the **Power of Myth**, **Mayan Spies** and **Priests** recover their power faster. Both **Spies** and **Priests** also have more health. The Mayan unique units are the **Quetzal Warrior**, **Hornet Thrower**, and **Sunray**.

VIII. Regional Powers

In addition to the **Abilities** above, each **Region** in **Empire Earth II** has a unique set of **Powers** throughout the **Epochs**. **Regional Powers** are activated by **left-clicking** on the **Regional Power** button in the UI. All **Regional Powers** are timed, and the remaining time that the **Power** is in effect is shown counting down within the icon.

Western Regional Powers

Tribal Customs (*Epochs 1 – 5*) All resource gathering (*not including Technology Points*) is increased.

Scientific Freedom (*Epochs 6 – 10*) Technology research time are reduced.

Rapid Deployment (*Epochs 11 – 15*) Any units garrisoned in the player's **Fortress** can be transported instantaneously to any target location that you have **line-of-sight (LOS)** to.

Middle Eastern Regional Powers

Supreme Effort (*Epochs 1 – 5*) Citizen's construction speed is increased.

Lost City (*Epochs 6 – 10*) All units and buildings within the limits of a selected **City Center** become cloaked, invisible to all enemy units (*including Spies and Outposts*.) Any of the player's units entering the effected city limits become invisible.

Black Market (*Epochs 11 – 15*) The player receives a percentage of all **market sales** and **trade route revenue** from a neutral or enemy players.

Far Eastern Regional Powers

Citadel (*Epochs 1 – 5*) Any **Walls**, **Wall Towers**, **Wall Gates**, **Palisades**, and **Palisade Gates** in the player's territories become immune to damage.

Burgeoning Markets (*Epochs 6 – 10*) Each time one of the player's **trade units** reaches a **market** or **dock**, the player receives an additional amount of each resource (*excluding Gold and Technology Points*) that they are currently harvesting.

Overtime (*Epochs 11 -1 5*) All units produced at the **Barracks**, **Stable**, **Workshop**, **Airport**, **Hangar**, and **Docks** are built more quickly.

Meso-American Regional Powers

Mass Conversion (*Epochs 1 – 5*) Any enemy units in or entering a **City Center** radius owned by the player have a chance of being instantly converted.

Favor of the Gods (*Epochs 6 – 10*) Any land unit or building owned by the player that is currently in a **Territory** that has a **Temple** has all incoming damage reduced.

Cloning Technology (*Epochs 11 – 15*) Every time an enemy or **neutral unit** is converted, an exact duplicate of the unit appears next to the converted unit.

IX. Wonders

By building a **Wonder**, you will endow your civilization with certain benefits. There are three types of **Wonders**, corresponding to crown types: **Economic**, **Imperial**, and **Military**. Each region has access to certain **Wonders**. Each **Wonder** provides a potent power that is active as long as the **Wonder** exists.

Western Wonders

Parthenon – Available in **Epochs 1-15**, the **Parthenon** grants the power of **Colonial Conquest**. With **Colonial Conquest**, territory claiming requirements are reduced to a **barracks** and a **workshop** (*or factory if in Epoch 9+*).

Brandenburg Gate – When you build the **Brandenburg Gate**, you will have the **Spoils of War power**. With this power, you will earn one tech point for every five enemy units killed. It is available in **Epochs 6-15**.

Pentagon – Build the **Pentagon** to access the **Homeland Defense power**. With **Homeland Defense**, all of your **Houses** gain the ability to fire on enemy targets. The **Pentagon** is available in **Epochs 11-15**.

Middle Eastern Wonders.

Sphinx – The **Sphinx' power** is the **Riddle of the Sphinx**. With this power, all of your buildings are completely immune to capture. It is available in **Epochs 1-15**.

Selmye Mosque – The power of this mosque is **Sultans Reward**, and it can have a dramatic effect, granting the player a portion of the **gold** build cost for every enemy unit or building that the player destroys. It is available in **Epoch 6-15**.

Desalinization Plant – The desalinization plant provides **Life to the Desert**. **Citizens** gather food faster, and population capacity is increased.

Far Eastern Wonders

Tower of the Moon and Stars – This wonder grants you the **Farseeing power**. You have the **maximum line of sight** on all of your **buildings**, and you also have **line of sight** on all other players' **City Centers**. It is available in **Epochs 1-15**.

Forbidden Palace – The luxurious Forbidden Palace brings with it the power **Splendor**. With **Splendor**, none of your resources are lost should any of your buildings be captured. When you capture other players' buildings, you receive an additional amount resources. This wonder is available in **Epochs 6-15**.

Robotics Factory – Build the **Robotics Factory** to gain the **power of Automation**. While this power is in effect, a randomly generated light and heavy mounted unit appears at the **Robotics Factory** once every minute. It is available in **Epochs 11-15**.

Meso-American Wonders

Temple of the Great Jaguar – The power associated with this wonder is **Art of War**. With **Art of War**, all enemy players' housing provides the same **Morale/Fervor** bonus to your invading troops as to their defending troops. This wonder is available in **Epochs 1-15**.

Great Pyramid of Tenochtitlan – The **Great Pyramid of Tenochtitlan** grants the power of **Proselytize**. Whenever a unit is successfully converted, there is a chance that any nearby units will also be instantaneously converted. It is available in **Epochs 6-15**.

Solar Power Station – The **Solar Power Station** uses the energy the sun provides, creating the power of **Energy Efficiency**. When you build this wonder, building construction and repair costs are reduced. It is available in **Epochs 11-15**.

XII. System Specifications

Minimum Specification

1. NVIDIA® GeForce™ 3 or equivalent DirectX® 9.0c-compliant 64 MB 3D video card with hardware T&L and pixel shader support
2. Microsoft® Windows® 98/Me/2000/XP operating system
3. 1.5 GHz Intel® Pentium® 4 or equivalent
4. 256 MB RAM
5. 1.5 GB of uncompressed hard disk space for game files
6. DirectX® 9.0c (included)
7. DirectX®-compatible sound card and speakers or headphones
8. 4X CD-ROM drive
9. Microsoft®-compatible mouse and keyboard
10. Minimum 56K dial-up modem for online play

Recommended Specification:

The recommended specification is exactly the same as the minimum specification with the following changes:

1. Microsoft® Windows® XP
2. NVIDIA® GeForce™ 4 or DirectX® 9.0c-compliant 128 MB 3D video card with hardware T&L and pixel shader support
3. 2.2 GHz Intel® Pentium® 4 or equivalent
4. 512 MB RAM or more
5. 1.5 GB of uncompressed hard disk space for game files
6. 24X or faster CD-ROM drive
7. Broadband/LAN, DSL or faster Internet connection for online play

XIII. LICENSE AGREEMENT

YOU SHOULD CAREFULLY READ THE FOLLOWING END USER LICENSE AGREEMENT BEFORE INSTALLING THIS SOFTWARE PROGRAM. BY INSTALLING, COPYING, OR OTHERWISE USING THE SOFTWARE PROGRAM, YOU AGREE TO BE BOUND BY THE TERMS OF THIS AGREEMENT. IF YOU DO NOT AGREE TO THE TERMS OF THIS AGREEMENT, PROMPTLY RETURN THE UNUSED SOFTWARE PROGRAM TO THE PLACE OF PURCHASE OR CONTACT SIERRA ENTERTAINMENT CUSTOMER SERVICE AT (800) 757-7707 FOR A FULL REFUND OF THE PURCHASE PRICE WITHIN 30 DAYS OF THE ORIGINAL PURCHASE.

This software program and any files that are provided by Sierra Entertainment, Inc., to you by on-line transmission or otherwise to 'patch,' 'update,' or modify the software program, as well as any printed materials, on-line or electronic documentation, and any and all copies and derivative works of such software program and materials are the copyrighted work of Sierra Entertainment, Inc. and/or its wholly owned subsidiaries, or its suppliers ("Sierra"). All use of the Program is governed by the terms of the End User License Agreement which is provided below ("License Agreement"). The Program is solely for use by end users according to the terms of the License Agreement. Any use, reproduction or redistribution of the Program not in accordance with the terms of the License Agreement is expressly prohibited.

END USER LICENSE AGREEMENT

1. Limited Use License. Sierra hereby grants, and by installing the Program you thereby accept, a limited, non-exclusive license and right to install and use one (1) copy of the Program for your use on either a home or portable computer. The Program also contains a "Campaign Editor" (the "Editor") that allows you to create custom levels or other materials for your personal use in connection with the Program ("New Materials"). All use of the Editor or any New Materials is subject to this License Agreement. In addition, the Program has a multi-player capability that allows users to utilize the Program over the Internet via gamespy.com or another gaming network designated by Sierra (an "On-line Provider"). Use of the Program over gamespy.com or other On-line Provider is subject to your acceptance of gamespy.com's or such other On-line Provider's Terms of Use Agreement as may be updated or modified at any time. The Program is licensed, not sold. Your license confers no title or ownership in the Program.

2. Ownership. All title, ownership rights and intellectual property rights in and to the Program and any and all copies thereof (including but not limited to any titles, computer code, themes, objects, characters, character names, stories, dialog, catch phrases, locations, concepts, artwork, animations, sounds, musical compositions, audio-visual effects, methods of operation, moral rights, any related documentation, and "applets" incorporated into the Program) are owned by Sierra or its licensors. The Program is protected by the copyright laws of the United States, international copyright treaties and conventions, and other laws. All rights are reserved. The Program contains certain licensed materials, and Sierra's licensors may protect their rights in the event of any violation of this Agreement. The Program may access websites owned, controlled by, or operated by licensed affiliates of Sierra, and receive patches and/or updates to the Program from these websites. All patches, updates or other downloadable material used by, or incorporated into, the Program are the copyrighted property of Sierra, who reserves all rights therein, and shall be governed by the terms and conditions of this Agreement.

3. Responsibilities of End User.

A. Subject to the Grant of License hereinabove, you may not, in whole or in part, copy, photocopy, reproduce, translate, reverse engineer, derive source code from, modify, disassemble, decompile, create a source code equivalent of, create derivative works based on, or remove any proprietary notices or labels from the Program without the prior consent, in writing, of Sierra.

B. The Program is licensed to you as a single product. Its component parts may not be separated for use on more than one computer.

C. You are entitled to use the Program for your own use, but you are not entitled to:

(i) sell, grant a security interest in or transfer reproductions of the Program to other parties in any way, nor to rent, lease or license the Program to others without the prior written consent of Sierra;

(ii) exploit the Program or any of its parts for any commercial purpose, including, but not limited to, use at a cyber café, computer gaming center or any other location-based site (Sierra may offer a separate Site License Agreement to permit you to make the Program available for commercial use; contact Sierra for details);

(iii) use or allow third parties to use the Editor and the New Materials created thereby for commercial purposes, including, but not limited to, distribution of New Materials on a stand-alone basis or packaged with other software or hardware through any and all distribution channels, including, but not limited to, retail sales and on-line electronic distribution, without the express written consent of Sierra;

(iv) host or provide matchmaking services for the Program or emulate or redirect the communication protocols used by Sierra in the network feature of the Program, through protocol emulation, tunneling, modifying or adding components to the Program, use of a utility program or any other techniques now known or hereafter developed, for any purpose, including, but not limited to, network play over the Internet, network play utilizing commercial or non-commercial gaming networks, or as part of content aggregation networks, without the prior written consent of Sierra; and

(v) create or maintain, under any circumstance, more than one simultaneous connection to any hosting service utilized for on-line play. All such connections, whether created by the Program or by other tools and utilities, may only be made through methods and means expressly approved by Sierra. Under no circumstances may you connect, or create tools that allow you to connect, to the hosting service's private binary interface or interfaces other than those explicitly provided by Sierra for public use.

4. Program Transfer. You may permanently transfer all of your rights under this License Agreement, provided the recipient agrees to the terms of this License Agreement and you agree to remove the Program and any New Materials from your home or portable computer.

5. Termination. This License Agreement is effective until terminated. You may terminate the License Agreement at any time by destroying the Program and any New Materials. Sierra may, at its discretion, terminate this License Agreement in the event that you fail to comply with the terms and conditions contained herein. In such event, you must immediately destroy the Program and any New Materials.

6. Export Controls. The Program may not be re-exported, downloaded or otherwise exported into (or to a national or resident of) any country to which the U.S. has embargoed goods, or to anyone on the U.S. Treasury Department's list of Specially Designated Nationals or the U.S. Commerce Department's Table of Denial Orders. By installing the Program, you are agreeing to the foregoing and you are representing and warranting that you are not located in, under the control of, or a national or resident of any such country or on any such list.

7. Customer Service/Technical Support. "Customer Service" as used herein may be provided to you by Sierra representatives by telephone and/or by electronic message (e-mail). "Technical Support" may be provided to you by Sierra by telephone, by electronic message (e-mail), or by posting of information related to known technical support issues on a website. Unless otherwise stated in the Program's packaging or in the Program's user manual, nothing herein shall be construed so as to place a duty upon Sierra to provide Customer Service or Technical Support via a toll-free telephone number for an unlimited period of time.

8. Duration of the "On-Line" Component of the Program. This Program contains an "on-line" component that allows you to utilize the Product over the Internet utilizing servers and software maintained by Sierra and or its affiliates. Sierra may, in its sole discretion, provide the servers and software technology necessary to utilize the "on-line" component of the Program, or Sierra may license to third parties the right to provide the servers and software technology necessary to utilize the "on-line" component of the Program. However, nothing contained herein shall be construed so as to place an obligation upon Sierra to provide the servers and software technology necessary to utilize the "on-line" component beyond the time that the Program is Out of Publication. The term "Out of Publication" as used herein shall mean that the Program is no longer being manufactured by Sierra.

9. Limited Warranty. Sierra expressly disclaims any warranty for the Program, Editor and Manual(s). The Program, Editor and Manual(s) are provided "as is" without warranty of any kind, either express or implied, including, without limitation, the implied warranties of merchantability, fitness for a particular purpose, or non-infringement. The entire risk arising out of use or performance of the Program and Manual(s) remains with the User; however, Sierra warrants up to and including 90 days from the date of your purchase of the Program that the media containing the Program shall be free from defects in material and workmanship. In the event that the media prove to be defective during that time period, and upon presentation to Sierra of proof of purchase of the defective Program, Sierra will at its option 1) correct any defect, 2) provide you with a product of equal or lesser value, or 3) refund your money. Some states do not allow the exclusion or limitation of implied warranties or liability for incidental damages, so the above limitations may not apply to you.

10. Limitation of Liability. NEITHER SIERRA ENTERTAINMENT, INC., THE ON-LINE PROVIDER, NOR EACH OF ITS RESPECTIVE PARENTS, SUBSIDIARIES OR AFFILIATES SHALL BE LIABLE IN ANY WAY FOR LOSS OR DAMAGE OF ANY KIND RESULTING FROM THE USE OF THE PROGRAM, THE EDITOR OR AN AUTHORIZED ON-LINE GAME NETWORK, INCLUDING, BUT NOT LIMITED TO, LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES. ANY WARRANTY AGAINST INFRINGEMENT THAT MAY BE PROVIDED IN SECTION 2-312(3) OF THE UNIFORM COMMERCIAL CODE AND/OR IN ANY OTHER COMPARABLE STATE STATUTE IS EXPRESSLY DISCLAIMED.

FURTHER, EACH OF SIERRA ENTERTAINMENT, ITS PARENT AND THE ON-LINE PROVIDER SHALL NOT BE LIABLE IN ANY WAY FOR THE LOSS OR DAMAGE TO PLAYER CHARACTERS, ACCOUNTS, STATISTICS OR USER PROFILE INFORMATION STORED ON AN AUTHORIZED ON-LINE GAME NETWORK, INCLUDING GAME-SPY.COM. EACH OF SIERRA ENTERTAINMENT, ITS PARENT, AND THE ON-LINE PROVIDER SHALL NOT BE RESPONSIBLE FOR ANY INTERRUPTIONS OF SERVICE ON GAMESPY.COM OR OTHER AUTHORIZED ON-LINE GAME NETWORK, INCLUDING, BUT NOT LIMITED TO, ISP DISRUPTIONS, SOFTWARE OR HARDWARE FAILURES, OR ANY OTHER EVENT WHICH MAY RESULT IN A LOSS OF DATA OR DISRUPTION OF SERVICE. Some states do not allow the exclusion or limitation of incidental or consequential damages, or allow limitations on how long an implied warranty lasts, so the above limitations may not apply.

11. Equitable Remedies. You hereby agree that Sierra would be irreparably damaged if the terms of this License Agreement were not specifically enforced, and therefore you agree that Sierra shall be entitled, without bond, other security, or proof of damages, to appropriate equitable remedies with respect to breaches of this License Agreement, in addition to such other remedies as Sierra may otherwise have available to it under applicable laws. In the event any litigation is brought by either party in connection with this License Agreement, the prevailing party in such litigation shall be entitled to recover from the other party all the costs, attorneys' fees and other expenses incurred by such prevailing party in the litigation.

12. Limitations on License. Nothing in this License Agreement shall preclude you from making or authorizing the making of another copy or adaptation of the Program, provided, however, that (1) such new copy or adaptation is created as an essential step in your utilization of the Program in accordance with the terms of this License Agreement and for NO OTHER PURPOSE; or (2) such new copy or adaptation is for archival purposes ONLY and all archival copies are destroyed in the event of your Transfer of the Program, the Termination of this Agreement or other circumstances under which your continued use of the Program ceases to be rightful.

13. Miscellaneous. This License Agreement shall be deemed to have been made and executed in the State of California, and any dispute arising hereunder shall be resolved in accordance with the law of California. You agree that any claim asserted in any legal proceeding by one of the parties against the other shall be commenced and maintained in any state or federal court located in the State of California, County of Los Angeles, having subject matter jurisdiction with respect to the dispute between the parties. This License Agreement may be amended, altered or modified only by an instrument in writing, specifying such amendment, alteration or modification, executed by both parties. In the event that any provision of this License Agreement shall be held by a court or other tribunal of competent jurisdiction to be unenforceable, such provision will be enforced to the maximum extent permissible, and the remaining portions of this License Agreement shall remain in full force and effect. This License Agreement constitutes and contains the entire agreement between the parties with respect to the subject matter hereof and supersedes any prior oral or written agreements.

You hereby acknowledge that you have read and understand the foregoing License Agreement and agree that the action of installing the Program is an acknowledgment of my agreement to be bound by the terms and conditions of the License Agreement contained herein. You also acknowledge and agree that this License Agreement is the complete and exclusive statement of the agreement between Sierra and yourself and that the License Agreement supersedes any prior or contemporaneous agreement, either oral or written, and any other communications between you and Sierra.

Notes

RULE THE WORLD

from the Stone Age to the Modern Age and beyond Empire Earth II® brings the battles, triumphs and struggles of history to life. The powerful Intel® Pentium® 4 Processor with HT Technology and Intel® 925X Express Chipset will bring the gaming to life.

*Look for systems with the Intel® Pentium® 4 Processor with HT Technology logo which your system vendor has certified utilize Hyper-Threading Technology. Performance will vary depending on the specific hardware and software you use. See <http://www.intel.com/tech/performance/> for information. Copyright © 2005 Intel Corporation. All rights reserved. Pentium and the Intel Inside logo are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.
