NOTES ON THE CD VERSION

ACES OF THE DEEP DEMO

Included on the CD version of the *EarthSiege Expansion Pack* is a playable demo of the *Aces of the Deep* U-boat simulation from Dynamix. After installation, the demo plays from the CD.

To install the demo, first insert the *Expansion Pack* CD. From the DOS prompt, change to your CD drive (usually **D:**), and type **aoddemo** [Enter]. This installs some files on your hard drive (default directory is **C:\DYNAMIX\AODDEMO**). On your hard drive, start the demo from the **\AODDEMO** directory by typing **demo** [Enter]. Open the **README** text file for game play information.

IMAGINATION NETWORK SAMPLER

Also included on the CD is a "sampler" for the ImagiNation Network (INN). The INN is the premier interactive on-line entertainment service. If you have a modem, you can connect your computer to INN and play games with people from all over the country. This sampler allows you to access the network and offers a limited membership. To install it, insert the *Expansion Pack* CD, change to your CD drive (usually **D:**), type **fun** or **inn** [Enter], and follow the on-screen instructions.

BRIEFING

MAJ-GEN J. GIERLING, CINC EARTH DEFENSE FORCE
PERSONAL LOG: 3.2.2553

In the moments after our squads crushed the last Cybrid position at the Prometheus facility, there was a long, incredulous silence. Then cheers, laughter, and suddenly, the first real celebration since the Overthrow. The grunts just about blacked out from leaping and whooping and carrying on. After 20 years of Cybrid domination, the Earth was ours again. It was days later—exhausted, hung over, voices hoarse—that we began rebuilding what was left.

The first task was to establish comm links to the space colonies, to see if anyone there had survived the Cybrid occupation. But as the orbital tracking station was brought back on line, the Big Board displayed terrifying news. Every scan across the orbital plane showed hundreds of ships approaching from the colonies on maximum burn. Cybrid ships. The party was definitely over.

We now have only days to prepare for this Cybrid invasion armada. We must assume that Prometheus has somehow survived. Nothing else can explain what built this fleet, or is leading it against us.

Our scientists and engineers are working around the clock to develop new weapons. Our new Apocalypse HERC will be ready soon. Our only chance is to delay the landings until we can build up our forces. With enough time, we might be able to fight off the landings, find and destroy Prometheus, and end this madness forever.

I only pray that some day we can walk the Earth without fear of the dread machines.
