

Preflight Checklist

About This Checklist

Welcome to Sierra On-Line's *Pro Pilot*. This checklist provides information on the system requirements to run *Pro Pilot* and how to install the simulation. Technical support and sales support contact information is also provided.

To connect to the *Pro Pilot* Web Site, a 9600-baud (or faster) modem with a Web browser and an Internet connection is required.

Installing *Pro Pilot*

1. Start *Windows 95*.
2. Insert the *Pro Pilot* Installation CD into your CD-ROM drive.
3. The *Pro Pilot* introductory video will play, then the Autoplay screen will appear in 5-10 seconds. Click **Install**. (To skip the video, click anywhere on the screen while it is playing.)
4. When the *Pro Pilot* setup screen appears, follow the on-screen instructions.

These instructions assume that you are using CD drive **D:**. If not, please substitute the appropriate drive letter for **D:**.

To manually install *Pro Pilot*:

1. Start *Windows 95*.
2. Insert the *Pro Pilot* Installation CD into your CD-ROM drive.
3. Select *Run* from the *Windows Start* menu.
4. In the File text box, type D:\SETUP.EXE. Click **OK**.
5. Follow the on-screen instructions.

Post Installation Notes

When you install *Pro Pilot*, a Sierra Utilities icon appears at the top of your *Windows Start* menu. This utility allows you to easily register or uninstall any Sierra programs that are detected on your computer. You may also access the Readme file for any program that this utility detects. The Support option is an online Setup Help file that provides answers to hardware questions, troubleshooting issues, and explains how to create a *Windows* boot disk.

If, for any reason, you would like to remove this icon, go to the *Start* menu and select **Settings > Taskbar**. Select the **Start Menu Programs** tab and click the **Remove** button. Scroll to the bottom of the programs list where you should see the Sierra Utilities icon listed. Highlight it and click **Remove**.

Also upon installation, a NetMarket icon was placed on your desktop. This is an Internet shortcut to the online shopping and travel service offered by CUC International, the parent company of Sierra On-line. If you have an Internet browser and a connection, take a moment to browse the great buys, special offers, and entertaining games that this site provides. If you'd like to remove this icon, simply drag it into the Recycle bin.

Running *Pro Pilot*

1. Start *Windows 95*.
2. Insert the *Pro Pilot* Installation CD into your CD-ROM drive.
3. The *Pro Pilot* Autoplay screen will appear in 5-10 seconds. Click **Fly!** to start *Pro Pilot*.
4. Click **Reinstall** to install *Pro Pilot* under a different configuration.
5. Click **Online Help** to access information about running the simulation.
6. Click **Web Page** to access the *Pro Pilot* Web site on the Internet.

To manually start *Pro Pilot*:

1. Start *Windows 95*.
2. Insert the *Pro Pilot* Installation CD into your CD-ROM drive.
3. Select *Programs > Sierra > Pro Pilot* from the *Windows Start* menu.
4. Click **Fly!** to start *Pro Pilot*.

Additionally, if you are a first-time user, you are provided with the option of viewing an AVI (movie) on cockpit familiarization, followed by an in-flight takeoff and traffic pattern route, with a subsequent landing, all with a flight instructor onboard. This flight can be watched passively, or interrupted if you want to take control of the aircraft.

Configuring a Joystick or Yoke

1. Plug your joystick or yoke into your computer's game port. On most computers, this port is located on the sound card or near where your speakers are plugged in to your computer.
2. Install *Pro Pilot*.
3. Run *Pro Pilot*.
4. Select the "Options" menu at the top of the main screen.
5. Select "Flight Controls."
6. Click on the "Joystick/Yoke On" checkbox to set a joystick or yoke as your flight controller.
7. Set the sensitivity of the ailerons, elevators, rudders, and dead space controls.

Calibrating a Joystick or Yoke

1. Start *Windows 95*.
2. Select *Setting/Control Panel* from the *Windows Start* menu.
3. Double click on the Joystick icon in the Control Panel.
4. Make sure your joystick is showing in the Current Joystick window, and click **Calibrate**.
5. Follow the calibration procedure.
6. Once you have completed the calibration, click **Test**.
7. Check that the cross-hair is in the center of the square. Check that it moves left and right when you move the control, and that it moves up and down when you press forward and pull back on a joystick or yoke.
8. Click **OK** to return to the Control Panel

Online Help

Information about all of the menus and dialog boxes that you'll encounter in *Pro Pilot* is available via an online help system. The online manual also details the cockpit instrumentation for each aircraft. To access the online manual, select the "Help" menu from the top right corner of the *Pro Pilot* screen. This menu has five options:

1. Contents – This displays an online table of contents.
2. Search – You may search for help on a particular topic by keyword or phrase.
3. Sections – Each of the sections listed here will take you to a secondary table of contents to help you refine your search.
4. How to Use Help – This brief explanation will help you navigate within the online manual more easily.
5. About *Pro Pilot*
