FIELD & STREAM® Trophy Hunting Installation Guide

About This Manual

Welcome to the FIELD & STREAM® Trophy Hunting Installation Guide. This booklet shows you how to get the game installed and running, and provides a brief overview. Once you start FIELD & STREAM® Trophy Hunting, you'll find several kinds of built-in help to answer any game play questions you might have:

- Press F1 or click Help to open the online manual for Trophy Hunting. This shows you how to get the most out of all the game features and windows.
- Select Guide Services from the Main Menu to open your multimedia deer hunting guidebook.
- For help with the World Opponent Network (won.net) with Internet games, refer to the won.net section of the online manual.

Installing and Starting the Game

Installing the Game

1. Start Windows 95/98.
2. Insert the FIELD & STREAM® Trophy Hunting CD into the CD-ROM drive.
3. When the Install window appears, click on INSTALL and follow the on-screen instructions. (If the Install window does not appear, start Install by double-clicking Autorun on the Trophy Hunting CD.)

Starting the Game

1. Start Windows 95/98.
2. Insert the FIELD & STREAM® Trophy Hunting CD into the CD-ROM drive.
3. When the Autorun window appears, click on RUN to start the game. (You can also start it from the Sierra folder by double-clicking the game icon.)

Additional Setup Help

During Installation, TEST SYSTEM checks to make sure your computer can run the game. If you still have trouble installing or starting FIELD & STREAM® Trophy Hunting first check the Setup Help file. To do this, open the Sierra folder on the CD, then click sutil32.hlp. Search the Table of Contents to find help on your specific system component or problem. Additional information may be found in the Trophy Hunting README file.

Users with Internet access can select SIERRA WEBPAGE from the Setup screen to access customer support, frequently asked questions, and possible updates for FIELD & STREAM® Trophy Hunting. To access the Setup screen after installation, click Sierra Utilities from the Start menu.

Multiplayer Game Setup

FIELD & STREAM® Trophy Hunting supports two "remote" multiplayer game options. To use either of these options, each player must have the FIELD & STREAM® Trophy

Hunting CD installed and in the CD drive, as well as the appropriate hardware:

Network Play: All players need to be connected to the same local area network (LAN), and on the same fileserver and subnet. FIELD & STREAM® Trophy Hunting supports TCP/IP network protocol.

Internet Play: Each player needs an Internet browser that runs under Windows 95/98, and Internet access via modem or network.

FIELD & STREAM® Trophy Hunting Overview

This section briefly introduces the game's main features. See the online Preview and Help in the game for complete information.

FIELD & STREAM® Trophy Hunting is a big game hunting simulation based on real locations, real outdoor conditions, and real animal behavior. To succeed, you will need to con-

sider the weather, season, ground conditions, and many other factors that affect how real deer, moose, and elk act. What you learn by playing FIELD & STREAM® Trophy Hunting and reading the "Guide Services" multimedia deer hunting reference will be equally useful on real hunting trips...and vice versa.

If you have already mastered the basic how-tos of big game hunting, you'll find plenty of new challenges in hunting the Medium and Hard skill levels, or Tournament hunting against the computer. The ultimate challenge is Tournament hunting against other expert hunters over a local area network, or on the Internet.

Getting Started

To start hunting right away, select "Quick Hunt" from the Main Menu. This takes you straight into the woods with everything you'll need. Press F1 or click Help for quick information on how to navigate, find deer, moose, elk, and other topics.

To explore different skill levels, areas, and weather conditions, choose "Solo Hunt" from the Main Menu. Then select "Hunting Trip" and choose the settings you want.

When you're ready for more of a challenge, Single-Player Tournaments put you against simulated Pro opponents and tougher conditions. You'll need to have a pretty good grasp of the game's hunting controls, animal behavior, and gear selection to be competitive here. Try the "Guide Services" for hints.

"Career" mode allows a player to hunt with a different firearm over a series of seasons. Each season consists of a one-day hunt in each of the eight hunting areas with the same firearm. Your Boone and Crockett scores are totaled for each season and a running career total is displayed to allow you to track your improvement over time.

The greatest test of your skills is Multiplayer games with human opponents over a network, or the World Opponent Network (won.net) Internet server. Tournaments are fast and frenzied contests where every hour counts. Weigh in

with a prize trophy buck, and the bragging rights are all yours... at least until the next game starts.

There are two different modes when you're out on a hunting trip: Walking mode, just as it says, is when you're moving about the 3D hunting areas. In order to enter Shooting mode and raise your firearm press the Spacebar or click the Raise Firearm icon on the Inventory toolbar. Then you can aim and take your shot by pressing the Ctrl key. It's important to remember that you can't walk while in shooting mode especially because it's an unsafe hunting practice.

2. Keyboard Controls: Walking Mode

Up ArrowWalk Forward
SHIFT+Up ArrowRun Forward
ALT+Up ArrowSneak Forward
Down ArrowWalk Backward
SHIFT+Down ArrowRun Backward
ALT+Down ArrowSneak Backward

Right ArrowTurn Right - Large Increments
SHIFT+Right ArrowTurn Right- Small Increments
ALT+Right ArrowSidestep Right

2. Keyboard Controls: Shooting Mode

To enter shooting mode, press the spacebar.

Up ArrowAim Higher - Large Increments
ALT+Up ArrowAim Higher - Small Increments

Down ArrowAim Lower - Large Increments
ALT+Down ArrowAim Lower - Small Increments

Left ArrowTurn Left - Large Increments
ALT+Left ArrowTurn Left - Small Increments

Right ArrowTurn Right - Large Increments
ALT+Right ArrowTurn Right - Small Increments

3. Mouse Controls: Walking and Shooting Mode

To move throughout the 3D world using your mouse, simply left click in the 3D window and the cursor will disappear. To move forward, push the mouse forward. To turn left or right, just slide the mouse to either direction. To go backward, (you guessed it) pull back on the mouse.

While in mouse movement mode, you can raise and lower the firearm by right clicking on the mouse. While the firearm is raised, you can fire by left clicking on the mouse. To click on any interface buttons (such as inventory items or the Deer Finder button) you must lower the firearm (right click) and then left click. The cursor will reappear which you can then use to select the appropriate button. Simply left click on the 3D window again to return to mouse movement mode. It becomes quite simple after a short time.

Keyboard Controls: Mouse View

To enter Mouse View, click mouse cursor on the game window. (Hot Key M)

You can change your selection from mouse view to mouse move in the customizable controls in the options screen.
