## Playing YOU DON'T KNOW JACK

**YOU DON'T KNOW JACK** can be played by 1 to 3 players. When the game starts, listen to the instructions, enter the number of players and the players' names, and specify whether you want to play a regular 21-question game or a 7-question tournament-length game.

You can skip the instructions by pressing the **Space** bar any time during the instructions.

When you're asked to choose a category, press **1**, **2**, or **3** to make your selection. Pick your category quickly or the host will choose one for you!

To play **YOU DON'T KNOW JACK**, you gotta be smart and you gotta be quick. Each player gets a buzzer — **YOU DON'T KNOW JACK** uses the **Q**, **B**, and **P** keys on the keyboard. The first player to buzz in gets first crack at the question. Get the question right, and you get some cash. Get the question wrong, and you'll lose some cash. Questions are timed. You gotta buzz in before the timer runs out, so you gotta answer fast — no stalling allowed in this game.

**YOU DON'T KNOW JACK** has three kinds of questions: Multiple-Choice, Gibberish, and the Jack Attack.

### Multiple-Choice Questions

Multiple-Choice questions are worth \$1,000-\$6,000. Easy questions are worth less, tough questions are worth more.

Here's an example:

What accelerates fastest?

1. a Ferrari
2. the Space Shuttle
3. a flea
4. a hummingbird

If you think you know the answer to a Multiple-Choice question, hit your buzzer key quickly and choose your answer by pressing the **1**, **2**, **3**, or **4** key. Get the question right, and you get the cash. Get it wrong, and you're gonna pay for it.

If you don't know the answer to a Multiple-Choice question, don't get mad — just **Screw Your Neighbor!** Screw Your Neighbor™ is an option in which you force another player to answer the question. You can Screw Your Neighbor during any Multiple-Choice question, as long as you have a screw on-screen next to your name.

To Screw Your Neighbor, be the first to buzz in, press the **S** key (**S** for "screw"), and then pick someone to screw (you pick a player by pressing the player's number or buzzer key). It's that easy! But be sure to pace yourself, 'cause you get only one screw per round.

### The Gibberish Question™

Gibberish questions are rhyming puzzles worth \$5,000-\$10,000. Gibberish questions appear randomly once or twice during a game.

When a Gibberish question starts, listen closely to the Gibberish phrase and try to think of a quote, saying, lyric, or phrase that rhymes with it. If you can't think of the answer right away, listen for the host's clues. If you think you know what the Gibberish phrase rhymes with, buzz in, type your answer, and hit the **Return** key.

For example, what saying does this Gibberish phrase rhyme with?

**Hey! Lenny Craved His Ma Debby Burned.**

Or, in other words...

**A Penny Saved Is a Penny Earned.**

When you type in your answer, punctuation and capitalization don't count, but you gotta type the entire original phrase. Don't take too long to buzz in. The more time you take to buzz in on a Gibberish question, the less money it's worth. Sorry, no screwing allowed on Gibberish questions.

## The Jack Attack™

The Jack Attack is the last question of every game. The Jack Attack can make or break the game — you can earn big bucks or lose your shirt!

The Jack Attack is an association question. Once you're given a clue, you gotta find the link or association between two phrases or words. Easy, right? Wrong.

In a Jack Attack one phrase grows out from the center of the screen as potential matches fly by. Nothing stays on screen very long, so if you see a match, buzz in right away. If you get the match, you get some cash. Be careful! Not any match will do — it has to be the match that best fits the clue you've been given.

For example, if your Jack Attack clue is **Black and White** and you see the word "**Left**" zoom out from the center of the screen, wait until the word "**Right**" appears and buzz in immediately to get the money. Next, if the word "**Valuable**" zooms out, wait until "**Cheap**" appears and buzz in. In this example, you gotta buzz in when an opposite appears.

But be careful! Jack Attack questions can trick you. Don't get psyched out by decoy answers. If the word "**Valuable**" zooms out from the center, and you buzz in when the word "**Prizes**" appears, you'll lose money because your match didn't fit the clue, **Black and White**, which are opposites.

Each Jack Attack question has seven matches. Buzz in at the right time with the right match, and it's 2,000 bucks in your pocket. Buzz in at the wrong time, or when a decoy appears, and you'll lose 2,000 bucks — and not just once, but every time you're wrong. You can buzz in as many times as you'd like.

You can skip the host's Jack Attack instructions at any time by pressing the **Space** bar.

## Other YOU DON'T KNOW JACK Features

**YOU DON'T KNOW JACK** is full of surprises — so don't get cocky! Don't buzz in too fast on Multiple-Choice questions or you'll get Burned. If you're far in the lead, **Don't Be a Wimp!**™ Buzz in! Or, you may find yourself at the mercy of the audience!

And, don't forget to pack a bag lunch in case you go on a **Fiber Optic Field Trip**™.

## Organizing and Playing YOU DON'T KNOW JACK Tournaments

The 7-question tournament-length game is perfect for hosting your very own **YOU DON'T KNOW JACK** party or tournament.

To hold a **YOU DON'T KNOW JACK** tournament, collect the names of all the players in the tournament and write them on a copy of the tournament scorecard printed on the next page. In the second column write down the names of the winners of the games in Heat 1. The winners advance to Heat 2 of the game; you can send the losers home with consolation prizes.
